

Three Dimensional Form Project

Keep up your art skills by drawing food in tone

Draw items out of kitchen cupboards

1) Box of food

2) Bottle

3) Jar

4) Spherical fruit and veg

5) A can for drink or food

Common mistakes: -

- 1) Pupils make a mistake when they add a flat bottom rather than a curved one to cylindrical objects.
- 2) Students sometimes do not use parallel lines when creating cuboids.
- 3) Add curved labels that run parallel with the bottom and top of cylindrical objects.

Extension: - Create a colour study digitally, with paint and colouring pencils

Upload photos of your drawings (digital, pencil, paint and/or ink) to me through your classes Microsoft Team
