

Welcome

VOCAL offers a peer support group for parents of young people aged 11–25 who are experiencing mental health issues.

We recognise that mental illness is complex, however, we believe that peer support can benefit parents of children with diverse mental health symptoms and conditions. We hope to:

- **Help improve your wellbeing.**
- **Support you with ways you can help your child.**
- **Navigate complex systems such as social work assessments and welfare benefits.**
- **Help you find out more about your rights as a carer.**
- **Provide you with a safe space to share your experiences and hear from other carers in similar situations.**

Peer support

Peer support is when people use their own experiences to help each other. Members of the group can decide how to run the group and what topics they would like to cover. Initially, Megan (Parent Carer Support Practitioner) will host the group until everyone settles in and then it will be passed to the members.

In line with the purpose of a peer support group, the initial meetings will lay the foundation for the group including the group agreement, your hopes, structure, and guidelines. All conversations in the peer support group will be treated in confidence.
